To Whom It May Concern:

As a senior dental student, I am excited and eager to start my dental career founded in the teachings and principles I have learned at the Arthur A. Dugoni School of Dentistry. My goal after graduation is to find an associate position as a general dentist where I can expand my knowledge of dental techniques, practice management, and comprehensive patient care.

I would like to join a practice that shares the same values and practice philosophy as I do. I believe in providing my patients with high-quality, comprehensive dental care in a safe and comfortable environment. Furthermore, I believe patient education and prevention is an important component in successful dental treatment. I want my patients to play an active role in their dental care and make informed decisions that form a treatment plan best suited for the individual. Being so young in my career, I value my personal and professional growth and hope to find a practitioner eager to share their dental wisdom and insight with a recent dental school graduate.

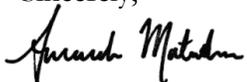

My clinical experience at school has prepared me well. I can perform a wide range of dental procedures in an efficient manner, while still maintaining a high level of quality. The depth of how I look at a clinical problem now compared to when I was just starting clinic has developed dramatically. I know that I still have so much to learn and I am excited for this next step in my career. My dental education is based upon fundamental dental techniques, but also incorporates evidence-based advancements in materials, instrumentation, and procedures. I also have a firm understanding in using digital technology, including digital patient management, radiographic, and scanning/impression systems. In the future, I hope to utilize my ability to quickly learn and implement dental techniques and concepts through continuing education courses and dental study groups.

With the main clinic of my dental school being in the transportation hub of Soma, I have had the opportunity to treat patients of all backgrounds and ages. I am comfortable treating patients of all ages and abilities; I have enjoyed cleaning up “sugar bugs” pediatric clinic, as well as treating patients in our special care clinic. I take pride in communicating well with my patients and building a trusting relationship, which ultimately leads to better patient education, treatment plan understanding and acceptance, and most importantly, meaningful relationships.

I am confident in my ability to immediately contribute to an expanding dental practice. I see myself as an asset to any dental team in need of a hardworking associate focused on becoming the best dental practitioner possible.

Thank you for your consideration.

Sincerely,

Amanda Matsuhara
